XR580 BEAM

PR-2554

The user manual contains important information about the safe installation and use of a projector. Please read and follow these instructions carefully and keep the manual in a safe place for future reference.

PR LIGHTING LTD.

http://www.pr-lighting.com

INDEX

ACCESSORIES

The following items are supplied with the projector and please check:

Name	Quantity	Unit	Remark
G clamps	2	Pcs	
XLR connector	1	Set	Male and female
Safety cord	1	Pc	
User manual	1	Pc	
Ω clamps	2	Pcs	Optional

Please note that as part of our ongoing commitment to continuous product development, specifications are subject to change without notice. Whilst every care is taken in the preparation of the manual we reserve the right to change specifications in the course of product improvement. The publishers cannot be held responsible for the accuracy of the information herein, or any consequence arising from them.
Every unit is tested completely and packed properly by the manufacturer. Please make sure the packing and / or the unit are in good condition before installation and use. Should there be any damage caused by transportation, consult your dealer and do not use the unit. Any damage caused by improper use will not be assumed by the manufacturer and / or dealer.

Note: For the products made by Guangzhou PR lighting Ltd, the warranty for the whole product is one year starting from the delivery date but the light source is not within the warranty.

1. SAFETY AND WARNINGS

> # NOTE
> **Before a projector's installation, power-on, operation and maintenance, please carefully read the safety information hereinafter!**

The following safety signs are used in the user manual.

Warning	User Manual	Electrical shock	Goggles	Protective Gloves	Flames	High Temperature

• **When unpacking , check if there is transportation damage before using the projector. Should there be any damage caused by transportation, consult your dealer and do not use it**.

• The manufacture is not responsible for loss caused by the user not following the manual or changing the projector as he/she likes.

• Please be noted that the damage caused by changing the projector at will is not warranted.

• Do not hesitate to contact the dealer or the manufacturer if any questions or advice.

• The projector is for indoor use only, IP20.

• Use only in dry locations. Keep this unit away from rain and moisture, excessive heat, humidity and dust. Do not allow contact with water or any other liquids.

• The projector should be kept away from high temperature, fire, electrical surge, vibration and strong light while being operated.

• The projector is only intended for installation, operation and maintenance by qualified personnel. And the operation must strictly follow the procedures in the manual.

• No repairable parts in the projector and do not open covers for maintenance by yourself.

• Don't look straightly into the light sources especially for epileptics, otherwise eyes will be burned..

• Do not connect this device to any type of dimmer pack.

• After lamp switched on, the minimum distance between the projector and illuminated surface is 18m.

• lens and other optical parts shall be replaced immediately if they have deformed or been damaged, otherwise the light output will be compromised.

• Before operation, please confirm that all covers(housing) are on and screws tightened. It's forbidden to use a projector while covers(housing)are off .

• Keep the lamp clean and do not touch it with bare hands.

• While operating it, wear protective items.

• Any electrical connection must be carried out by a qualified person .

• Before installation, please confirm the voltage supplied matches what is required for the projector.

• Each projector must be properly earthed and installed as per related electrical standards.

• Do not use power cord with its insulator damaged and connect the power cord with other cables.

• If the projector is not used or under cleaning,, please hold the plug and unplug it. Do not unplug it forcefully or by pulling the power cable.

• All power cords must conform to related safety and regulations.

• While being operated, the projector should not be under rains or in humidity.

• Do not switch on and off the projector constantly in very short intervals, otherwise the light source's and other electrical parts' life will be shortened .

- There are safety cord holes at the bottom of the base of a projector. In view of safety, please run the safety cord supplied through the safety cord holes for safety support.
- Before any installation, maintenance and cleaning work, please ensure the projector is disconnected from power mains.

- After running for 30minutes, the temperature of the housing of the projector is 45℃. After stable operation, its temperature is 90℃.
- While the lamp is stricken for the first time, there will be smoke and strange smell. It's normal and does not mean the projector has some defects.

- Do not mount the projector directly on inflammable surface.
- Do not project the beam straightly on combustible items and the minimum distance between the projector and illuminated items is 18m.
- A projector should be installed with good ventilation and the minimum distance between the projector and walls is 50cm. At the same time, please ensure the fans and air inlets and outlets are workable.

2. INSTRUCTIONS
• CLEANING AND MAINTENANCE

If a projector can't start. Please check if the fuse is blown up. If it does, replace it with a new fuse with same ratings. And the projector has over-temperature protective device. If the temperature is too high, the protective device will be triggered to shut the projector off. When it happens, please check if the fans run normally or fan shield is blocked by dust. After the issue is solved, restart the projector.

The accumulation of oil, smoke and dust on the lens will compromise the light output. Cleaning a projector is very necessary to ensure a reliable use of it. Cooling fans need to be cleaned every 15days. Internal lens, reflector and hot mirror need to be cleaned periodically to optimize light output.

Cleaning frequency is to be decided by operations and its environment. Use soft cloth and normal detergent for glass for cleaning work. It's advised external optical system be cleaned every 20days and internal optical systems every 30/60days. Keep lens clean and do not touch optical parts with bare hands.

- Before any maintenance and cleaning, please ensure the project is off the power.
- Only qualified person is allowed to do maintenance.
- During maintenance and before maintenance, the projector must be off power.

- To avoid sunlight or other light penetrating into the head via the front lens, resulting in high temperature interally causing damages to the projector. Before power-off, please use Tilt channel to move the head and make it facing downward.
- Do not use alcohol or other organic solvent to clean the housing to avoid damage.
- Do not use any solvent with chemical elements to clean color filters or hot mirror.

• LUBRICATION

To ensure smooth movement of gobos and zoom and focus lens, it's advised rotators' bearings and 2 sliding bars for zoom and focus lens be lubricated every 2 months. High quality and high temperature lubricant/grease is advised..

• TROUBLESHOOTING

PROBLEM	ACTION
The projector doesn't switch on	➤ Check the fuse on the power socket. ➤ Check the lamp.
The lamp is on but the projector doesn't respond to the controller	➤ Make sure that the fixture's start address is right ➤ Replace or repair the XLR signal cable.
The projector functions intermittently	➤ Make sure the fan is working well or fans and their shields are not blocked
Beam appears dim, Low in brightness	➤ Make sure the lamp is within its lifespan ➤ Remove dust or grease from the lenses.
The project image appears to have a halo	➤ Carefully clean the lamp, optical lenses and other components.

| Heavily Defective Beam | ➤ Check if lens are in good condition(not cracked) |
| | ➤ Clean dust or grease on the lens. |

2. Fuse Holder

3. Power Socket

4. 5-Pin XLR Socket(Female)

5. 5-Pin XLR Socket(Male)

6. Ethernet Socket

7. Wireless Antenna(Only for projector requested for wireless control)

Front Panel of the Base
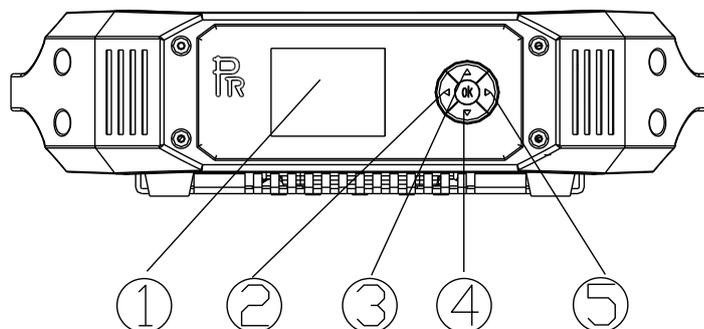

1. Touch Screen

2. Escape / Left Key

3.Up key

4. Down Key

5. Right Key

4. INSTALLATION

• RIGGING

Before moving a projector, Please lock Pan and Tilt. Before its operation, please unlock them. It's forbidden to run a projector with power while it is locked.
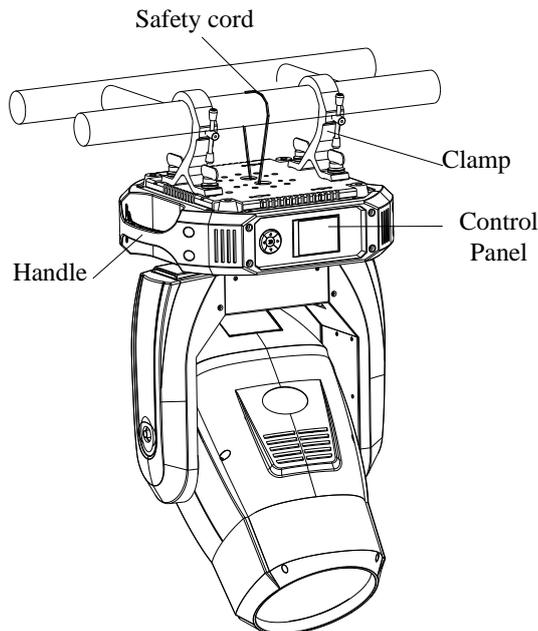

Take 2 clamps and the safety cord out from the package and mount 2 clamps on the underside of fixture with 2 retainers attached to each clamp. Hang the fixture on the structure and fasten the screws attached to each clamp. (See the **WARNING** on the underside of the base as shown above) **To pass the SAFETY CORD through the HOLES for safety!** Always ensure that the projector is firmly anchored to avoid vibration and slipping whilst functioning. Always ensure that the structure that you are going to mount the projector to is secure and strong enough to support the weight of a XR 1000 Framing.

WARNING:
• The projector MUST be lifted or carried by the HANDLES instead of clamps.
• For safety the safety cord should afford 10 times the Projector's weight.

• POWER CONNECTION

Connect the power cord as follows:
L (live) =brown
E (earth) =yellow/green
N (neutral) =blue

Before power connection, please ensure the power supplied must match what the nameplate says. It is recommended that each projector be connected with power separately so that they may be individually switched on and off.

• **The earth wire(yellow/green) must be connected to the ground. And electrical connection must be in accordance with the standards concerned.**
• **If any questions about the electrical installation, do not continue but consult a qualified electrician.**

•DMX CONTROL CONNECTION:

5-PIN

DMX OUT

DMX IN

DMX 512	
PIN	FUNCTION
1	GND
2	DATA-
3	DATA+
4	N/C
5	N/C
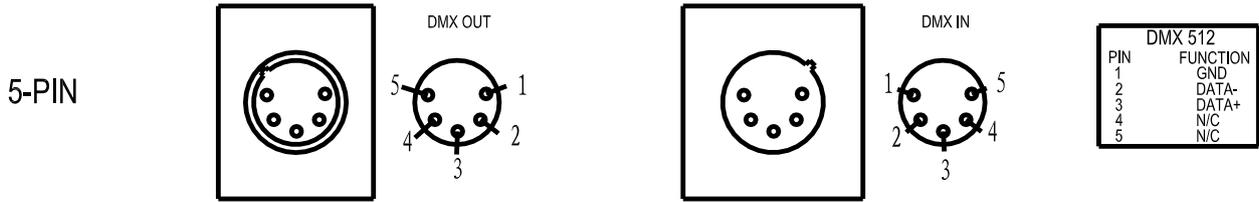

Connection between controller and projector and between one projector and another must be made with a twin-screened cable, with each wire having at least a 0.5mm in diameter. Connection to and from the projector is via cannon 5 pin (which are included with the projector) or 5 pin XLR plugs and sockets. The XLR's are connected as shown in the figure above.

Note: care should be taken to ensure that none of the pins touch the metallic body of the plug or each other. XLR plugs and sockets mustn't be connected in any way other than mentioned in the above figure. The XR330BWS accepts digital control signals in protocol DMX512 (1990).

Connect the controller's DMX output to the first fixture's DMX input, and connect the first fixture's DMX output to the second fixture's DMX input and connect the rest fixtures in the same way. Eventually connect the last fixture's DMX output to a DMX terminator as shown in the figure below.

DMX
controller   Input   Output   Input   Output   Input   Output   DMX
terminator
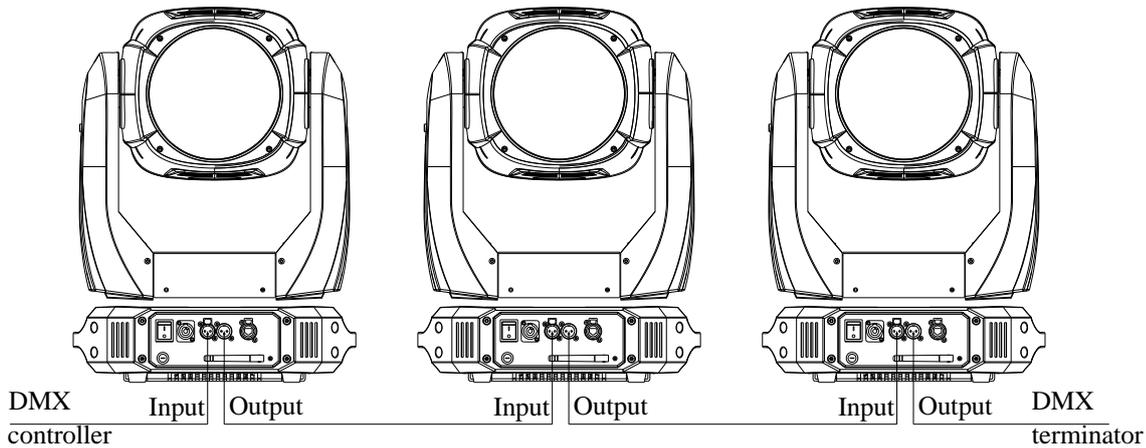

•DMX TERMINATOR
In the Controller mode, at the last fixture in the chain, the DMX output has to be connected with a DMX terminator. This prevents electrical noise from disturbing and corrupting the DMX control signals.
The DMX terminator is simply an XLR connector with a 120Ω (ohm) resistor connected across pins 2 and 3, which is then plugged into the output socket on the last projector in the chain. The connections are illustrated below.

DMX TERMINATOR
CONNECTION
Connect a 120Ω(OHM) resistor across pins 2 and 3 in an XLR plug and insert into the DMX out socket on the last unit in the chain.

120 Ω

PIN 2   PIN 3
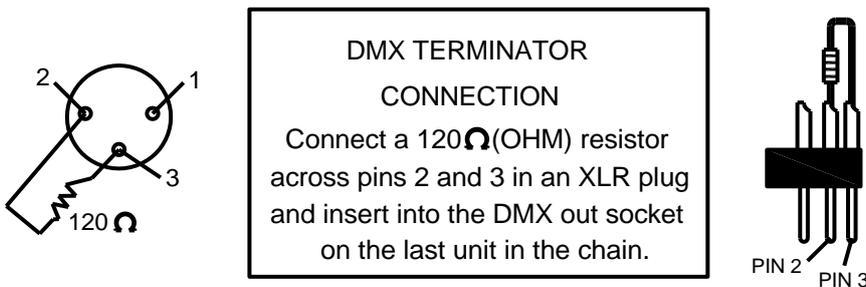

●ALIGNMENT/INSTALLATION/REPLACEMENT OF A LAMP

Lock the yoke before fitting/replacingthe lamp. Just as Shown by Figure 1, after Opening the cover at the rear of the projector by loosening 8 fastfit screws, you can open the head. To adjust the lamp as per Figure 2. Take out the lamp as per the figure 3.

Before lamp installation, tighten its power wires well. Lamp in and out are opposite orders

●Don't touch the internal surface of the reflector   and   the burner of the lamp with bare hands so as not to impair the beam output. While lamp's installation, do not damage the metal wire around the burner.

●Please read "Instructions " enclosed with the lamp

●Do operate the projector while adjusting the lamp

Figure1:Remove the lamp chamber cover after loosening 4 screws labeled as A,B,C,D.
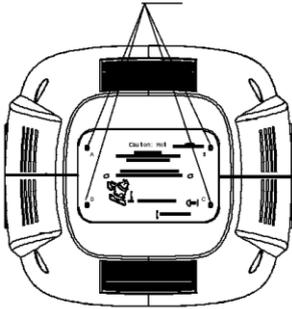

Figure2: Unplug the lamp wires ,loosen 4 pieces of spring screws for lamp tightening plate,adjust both adjusting rods on top and bottom to ensure that lamp clipping plate is away from the center of the lamp to the biggest extent, then push the lamp towards the spring. Take the lamp out obliquely after it is out of the tightening plate below, and lamp installation is same.

spring

spring screws

clipping plate

adjusting rods
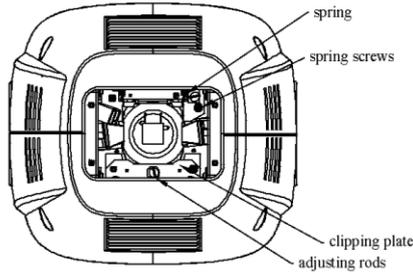

Figure3: After the lamp is in place, please check if the lamp is tightened well, then plug its wires and turn on the lamp.Use a flat screw driver to adjust the central position of the lamp upward,downward, rightwards, and leftwards as per the labeling.After the adjustment, lock the back cover the lamp chamber.

rightwards&leftwards

upwards&downwards
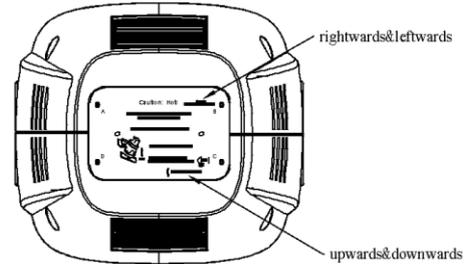

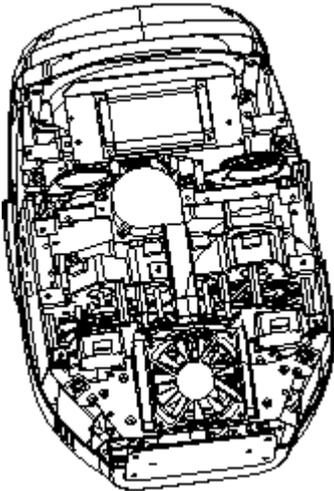

●GOBO REPLACEMENT

Rotating gobo replacement:

Open the head cover, and push the rotator of which its gobo needs to be replaced, out of the rotating gobo wheel. After the rotator is sliding out of the wheel, pull it gently. After the gobo replaced, insert the rotator into the wheel and ensure it is secured and not loose.

Rotating gobo wheel

Rotator

gobo

Gobo Pressure Spring
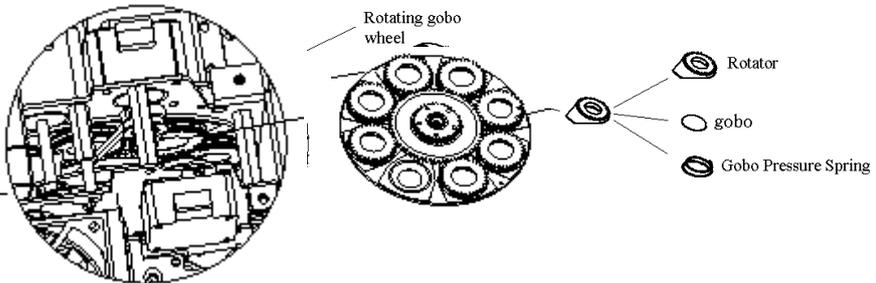

DANGER!

Before replacement of gobos, the projector must be off the power.

5. SETUP AND CONFIGURATION
•FRONT PANEL OPERATION
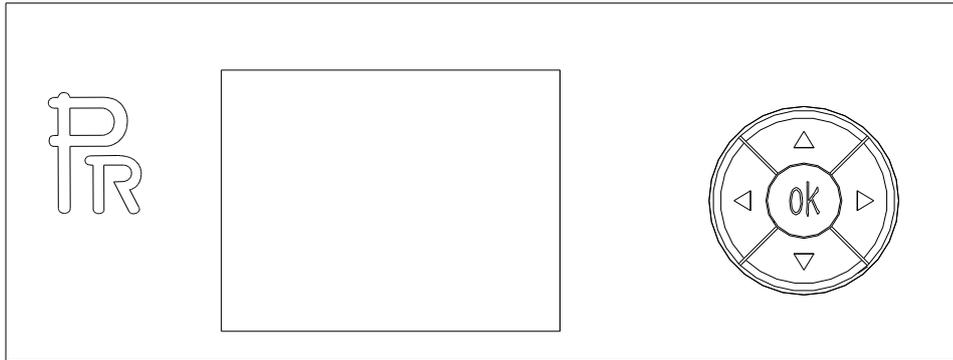

The projector configuration can be set conveniently via push buttons and color touch screen.

To browse through or change the projector 's settings, touch the white area of the touch screen or press OK button for more than 3s(Only powered by the battery, pressing the OK button) to unlock the screen , then press ▶ key to enter the projector 's function menus. Each main menu has its sub-menus. And each menu stands for special function. For the details, please see the following 6th point "Operation Menu".:

1. At the page to set the fixture's functions, press ◀,▶,▲,▼ keys or their respective icons to select the functions desired.

2. While at 2nd,3rd and 4th level of menus, the ◀ key is for ESCAPE, but ▶ key won't work, and OK key is used for ENTER. Press OK key to save the changes or enter into the sub menus. Press ▲or ▼ keys to change the numbers(minus or plus). Or touch the option needed for change.

   Shortcut keys: After the Function Menu is entered into, there are all options for the functions on the top of the screen. On the right there are 4 shortcut keys like ←,→ Lamp Control and English/Chinese.

• DMX START ADDRESS

Each projector must be given a DMX start address so that the correct projector responds to the correct control signals. This DMX start address is the channel number from which the projector starts to "listen" to the digital control information being sent out from the controller. The projector has 3DMX modes. There are standard mode ,short mode and extended mode. For example standard mode has 26 **c**hannels, so set the No. 1 projector's address 001, No. 2 projector's address 027, No. 3 projector's address 053,No. 4 projector's address 079, and so on.

Switch on the Projector . Press OK key more than 3 seconds to unlock panel, then press ▶ key to enter into the fixture's operation menus.

Select DMX Address icon and press OK key or touch the icon directly on the display and select DMX address at the 2nd level menu for the address setting.

Press ▲ or ▼ keys or touch<、>displayed for the DMX address desired.

Press OK key to confirm.

Press the◀ key to go back to the upper level menu.
.

•DMX WIRELESS CONTROL

The projector has wireless control function with wireless receiver module and antenna for remote control.

The setup of it is below:

1. Press OK for more than 3s to unlock the control panel, then press ▶ key to enter into the operation menu and select "Config Settings".

2. Select "Wireless First" or "Wireless Only" from the menu of "Signal Select".

Only after the projector is linked with a transmitter, can it receive wireless signal sent by the transmitter. If unlinking it, Press "Enter" for the menu of Un-link Wireless under the upper level menu of Config Settigns , then the fixture is unlinked with the wireless transmitter.

•**STAND-ALONE MODE**

Operate the projector without connecting with a controller, enable the master mode through the operation panel, the projector will run in Stand-Alone mode automatically.

DMX address can be set at any number within 512.

•**MASTER/SLAVE MODE**

Many projectors can run synchronously in the Master/Slave mode by linking them with each other. First, connect the first fixture's DMX output to the second fixture's DMX input using XLR-XLR control cable and then connect the second fixture's DMX output to the third fixture's DMX input, and so on until all projector are connected in this way. Eventually connect the last fixture's DMX output to a DMX terminator. Set 1st projector as the master and others are Slaves.

Start Addresses of all Slaves are 001; Operation mode of the Master can be set any mode for a Master' and Slaves' operation mode can be set accordingly.

After Powered on, the group will run in Master/Slave Mode

| Master | Slave | Slave |

| DMX controller | Input | Output | Input | Output | Input | Output | DMX terminator |

9.Error messages

The system can detect some errors during the reset, if displayed, touch to view the error.
The error messages are as follows:

Name	Type	Correction
Pan	Timeout/magnet Sensor/Encoder	Check if wiring, positioning parts and motors are normal
Tilt	Timeout/magnet Sensor/Encoder	Check if wiring, positioning parts and motors are normal
Cyan	Timeout	Check if wiring, positioning parts and motors are normal
Yellow	Timeout	Check if wiring, positioning parts and motors are normal
Magenta	Timeout	Check if wiring, positioning parts and motors are normal
CTO	Timeout	Check if wiring, positioning parts and motors are normal
Color Wheel	Timeout	Check if wiring, positioning parts and motors are normal
Fixed gobo wheel	Timeout	Check if wiring, positioning parts and motors are normal
Rot. Gobo Wheel	Timeout	Check if wiring, positioning parts and motors are normal
Rot. Gobo1Rotation	Timeout	Check if wiring, positioning parts and motors are normal
Dimmer	Timeout	Check if wiring, positioning parts and motors are normal
Prism 1	Timeout	Check if wiring, positioning parts and motors are normal
Prism 1 Rotation	Timeout	Check if wiring, positioning parts and motors are normal
Prism 2	Timeout	Check if wiring, positioning parts and motors are normal
Prism 2 Rotation	Timeout	Check if wiring, positioning parts and motors are normal
Focus	Timeout	Check if wiring, positioning parts and motors are normal
Lamp Fan1	Error	Check if fan and its wiring are normal
Lamp Fan2	Error	Check if fan and its wiring are normal
Ceramic Fan	Error	Check if fan and its wiring are normal

CMY Fan	Error	Check if fan and its wiring are normal
Head Fan	Error	Check if fan and its wiring are normal
Gobo Fan	Error	Check if fan and its wiring are normal
Basic Fan	Error	Check if fan and its wiring are normal
Pan and Tilt Board	Error	Check signal wire
Driver Board 1	Error	Check signal wire
Driver Board2	Error	Check signal wire
Driver Board3	Error	Check signal wire
Fan Board	Error	Check signal wire
Acceleration Sensor	Error	Check signal wire
Lamp on	Timeout	Check if he lamp is damaged
Lamp Life	Timeout Warning	
Lamp Off[Fan Error]	Error	Check if all fans are normal
Lapsed Time	Timeout	
Time IC	Error	
Lapsed time	X days	
Use hours Setting	successfully	

10. TECHNICAL DATA

ELECTRIC PARAMETERS

Input voltages 100V~240V AC，50/60Hz

Input Power 800W @ 220V

Current at Maximum 8A

Power factor: PF〉0.9

LAMP SPECIFICATIONS

|	
Lamp	PHILIPS MSD Platinum 25 R
Color Temperature	7800±300K
Manufacturers Rated Lamp Life	1500hours
Or	
Lamp	OSRAM SIRIUS HRI 550W XL
Color Temperature	7500±300K
Manufacturers Rated Lamp Life	1500hours

ROTATING GOBO WHEEL

1 Rotating gobo wheel:

7Interchangeable Gobos +Open

Bi-directionally rotatable, and shakable at variable speeds

Gobo Replaceable, Gobo diameter: Φ22.5mm ,Gobo image diameter: Φ12mm

Gobo1	Gobo 2	Gobo 3	Gobo 4	Gobo 5
Gobo 6	Gobo 7			

PRISM

3Pcs,(STD:1pc of 8-facet prism,1pc of 16-facet prism and 1pc of 4 facet linear prism) Bi-directional rotation with variable speeds(options: 3-facet/ 16-facet circular or gradient or linear prisms)

FROST

1Pc frost filter

FOCUS

DMX linear Focus

DIMMER/STROBE

0-100% Linearly adjustable/ Double shutter blades, 0.3~25 F.P.S

HEAD MOVEMENT

Pan 540 °, Tilt 270 °with auto position correction

BEAM ANGLE

Beam   2 °

CONTROL

DMX512, 5-pin interfaces(Optional 3-pin)

22channels in short mode, 26channels in standard mode , 30channels in extended mode

Self-test mode

OTHER FUNCTIONS

Adjustable Pan & Tilt speeds

Lamp's and fixture's hours displayed

Modular Structure for easy maintenance

DMX512 wireless receiever

Optional DMX512 Wireless Transmitter

HOUSING

High temperature ABS, IP20

NET WEIGHT:
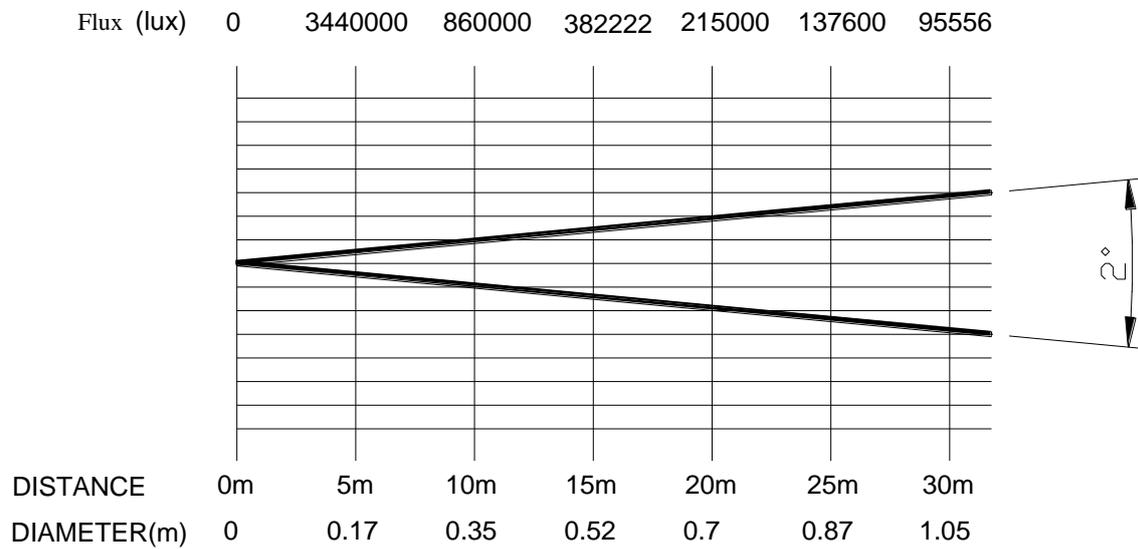

25.5 Kg

AMBIENT TEMPERATURE

Temperature at maximum 40℃

Waterproof projector: When the ambient temperature is below minus 20 Celsius, please preheat the lamp not less than 10 minutes and then reset the projector.
