

## **AQUA 580 BEAM**

**PR-2569**

The user manual contains important information about the safe installation and use of a projector. Please read and follow these instructions carefully and keep the manual in a safe place for future reference.

PR LIGHTING LTD.

## ACCESSORIES

The following items are supplied with the projector and please check:

Name	Quantity	Unit	Remark
G clamps	2	Pcs	
XLR connector	1	Set	Male and female
Safety cord	1	Pc	
User manual	0	Pc	QR Code
Ω clamps	2	Pcs	Optional

**Please note that as part of our ongoing commitment to continuous product development, specifications are subject to change without notice. Whilst every care is taken in the preparation of the manual we reserve the right to change specifications in the course of product improvement. The publishers cannot be held responsible for the accuracy of the information herein, or any consequence arising from them.**

**Every unit is tested completely and packed properly by the manufacturer. Please make sure the packing and / or the unit are in good condition before installation and use. Should there be any damage caused by transportation, consult your dealer and do not use the unit. Any damage caused by improper use will not be assumed by the manufacturer and / or dealer.**

**Note: For the products made by Guangzhou PR lighting Ltd, the warranty for the whole product is one year starting from the delivery date but the light source is not within the warranty.**

## 1. SAFETY AND WARNINGS

### NOTE

Before a projector's installation, power-on, operation and maintenance, please carefully read the safety information hereinafter!

The following safety signs are used in the user manual.

Warning	User Manual	Electrical shock	Goggles	Protective Gloves	Flames	High Temperature

- When unpacking, check if there is transportation damage before using a projector. Should there be any damage caused by transportation, consult your dealer and do not use it.
- The manufacturer is not responsible for any loss caused by the user not following the manual or changing a projector as he/she likes.
- Please be noted that the damage caused by changing a projector at will is not warranted.
- Do not hesitate to contact the dealer or the manufacturer if any questions or advice.
- If a lamp is damaged or deforms because of heat, it should be replaced. (It applies only to traditional lamps)

- The projector is for indoor and outdoor use, IP66.
- It can be used in humid and dusty areas. And it can contact water and other non-corrosive liquids.
- The projector should be kept away from high temperature, fire, electrical surge, vibration and strong light while being operated
- The projector is only intended for installation, operation and maintenance by qualified personnel. And the operation must strictly follow the procedures in the manual
- No repairable parts in the projector and do not open covers for maintenance by yourself.

- Don't look straightly into the light sources especially for epileptics, otherwise eyes will be burned.
- Do not connect a projector to any type of dimmer pack.
- If the lamp, lens and screen protective cover of the a projector have obvious damage, i.e., to the extent that it hurts the performance like cracking or deformation. Please stop using it and replace them with the original parts, otherwise its performance will be compromised.
- For the installation location of a projector, it shouldn't be seen in the distance of less than 4 meters for a long time.

- Before operation, please confirm that all covers (housing) are on and screws tightened. It's forbidden to use a projector while covers (housing) are off.
- Keep the lamp clean and do not touch it with bare hands.
- While operating it, wear protective items like eye goggles, gloves and etc..

- Any electrical connection must be carried out by a qualified person .
- Before installation, please confirm the voltage supplied matches what is required for a projector.
- Each projector must be properly earthed and installed as per related electrical standards.
- Do not use power cord with its insulator damaged and connect the power cord with other cables.
- If a projector is not used or under cleaning,, please hold the plug and unplug it. Do not unplug it forcefully or by pulling the power cable.
- All power cords must conform to related safety and regulations.
- If a projector is not water and dust proof, while being operated it should not be under rains or in humidity to avoid short circuit.
- Do not switch on and off a projector constantly in very short intervals, otherwise the light source's and other electrical parts' life will be shortened .

- There are safety cord holes at the bottom of the base of a projector. In view of safety, please run the safety cord supplied through the safety cord holes for safety support.
- Before any installation, maintenance and cleaning work, please ensure a projector is disconnected from power mains.

- While running normally under normal ambient temperature, the temperature of the external surface of the metal housing of a projector including that of the heat sink may reach 75°C at maximum.
- While the lamp is stricken for the first time, there will be smoke and strange smell. It's normal and does not mean a projector has some defects.

- While it running, don't touch the metal housing to avoid being burned!

- Do not mount a projector directly on inflammable surface.
- Do not project the beam straightly on combustible items and the minimum distance between a projector and illuminated items is 18m.
- A projector should be installed with good ventilation and the minimum distance between a projector and a wall is 50cm. At the same time, please ensure the fans and air inlets and outlets are workable.
- Do not let the front lens under sunlight or other strong light sources at any angle, otherwise the danger of fire can be caused by the focused beam by the lens inside a projector.

- The product meets The General Technical Requirements and Standards for Recycle and Use Of Expired Appliance and Electronic Products.
- When the product meets disposal standards and needs to be disposed, a client needs to dispose and recycle it.

## 2. INSTRUCTIONS

### •CLEANING AND MAINTENANCE

Under normal running, the protective units of a projector should be inspected regularly like power fuse. If it is burned, please install a new one and ensure it is the same rating as the burned one.

For a projector with an over-temperature protective unit, please inspect cooling units regularly like cooling fans, heat sink and other cooling parts. Please check if the fans run normally or fans and air inlets are blocked by dust. To keep air inlets /outlets clean, cooling fans should be cleaned every 15days.

For projectors with lens, reflectors and coated filters, the accumulation of oil, smoke and dust on them will compromise the light output. Cleaning a projector is very necessary to ensure a reliable use. Internal and external lens, flat glass, reflector and coated filters need to be cleaned periodically to optimize light output.

Cleaning frequency is to be decided by operations and its environment. Use soft cloth and normal detergent for glass for cleaning work. It's advised external optical system be cleaned every 20days and internal optical systems every 30/60days. For a projector with high IP rating, if no damage inside, it is advised to clean the surfaces of its housing in principle. Keep lens clean and do not touch optical parts with bare hands.

### Special note:

It's normal phenomena that there will be mild water mist on the lens while the waterproof product is in use.

- Before any maintenance and cleaning, please ensure a project is off the power.
- Only a qualified person is allowed to do maintenance.

- To avoid sunlight or other light penetrating into the head via the front lens, resulting in high temperature internally causing damages to a projector. Before power-off, please use Tilt channel to move the head and make the head facing downward.
- Do not use alcohol or other organic solvent to clean the housing to avoid damage.
- Do not use any solvent with chemical elements to clean coated filters.

#### •LUBRICATION

To ensure smooth movement of gobos and zoom and focus lens, it's advised rotators' bearings and 2 sliding bars for zoom and focus lens be lubricated every 2 months. High quality and high temperature lubricant/grease is advised..

#### •TROUBLESHOOTING

PROBLEM	ACTION
A projector doesn't switch on	<ul style="list-style-type: none"> <li>➤ Check the fuse on the power socket.</li> <li>➤ Check the lamp.</li> </ul>
The lamp is on but a projector doesn't respond to the controller	<ul style="list-style-type: none"> <li>➤ Make sure that the fixture's start address is right</li> <li>➤ Replace or repair the XLR signal cable.</li> </ul>
A projector functions intermittently	<ul style="list-style-type: none"> <li>➤ Make sure the fan is working well or fans and their shields are not blocked</li> </ul>
Beam appears dim, Low in brightness	<ul style="list-style-type: none"> <li>➤ Make sure the lamp is within its lifespan</li> <li>➤ Remove dust or grease from the lenses.</li> </ul>
The project image appears to have a halo	<ul style="list-style-type: none"> <li>➤ Carefully clean the lamp, optical lenses and other components.</li> </ul>
Heavily Defective Beam	<ul style="list-style-type: none"> <li>➤ Check if lens are in good condition(not cracked)</li> <li>➤ Clean dust or grease on the lens.</li> </ul>

### 3. APPEARANCE

### 4. INSTALLATION

#### •RIGGING

Before moving a projector, Please lock Pan and Tilt. Before its operation, please unlock them. It's forbidden to run a projector with power while it is locked.

Take 2 clamps and the safety cord out from the package and mount 2 clamps on the underside of fixture with 2 retainers attached to each clamp. Hang the fixture on the structure and fasten the screws attached to each clamp. (See the **WARNING** on the underside of the base as shown above) **To pass the SAFETY CORD through the HOLES for safety!** Always ensure that the projector is firmly anchored to avoid vibration and slipping whilst functioning. Always ensure that the structure that you are going to mount the projector to is secure and strong enough to support the weight of a XR 1000 Framing.

**WARNING:**

- The projector **MUST** be lifted or carried by the **HANDLES** instead of clamps.
- For safety the safety cord should afford 10 times the Projector's weight.

• **POWER CONNECTION**

Connect the power cord as follows:

L (live) =brown

E (earth) =yellow/green

N (neutral) =blue

Before power connection, please ensure the power supplied must match what the nameplate says. It is recommended that each projector be connected with power separately so that they may be individually switched on and off.

- The earth wire(yellow/green) must be connected to the ground. And electrical connection must be in accordance with the standards concerned.
- If any questions about the electrical installation, do not continue but consult a qualified electrician.

## DMX CONTROL CONNECTION:

Connection between controller and projector and between one projector and another must be made with a twin-screened cable, with each wire having at least a 0.5mm in diameter. Connection to and from the projector is via cannon 5 pin (which are included with the projector) or 5 pin XLR plugs and sockets. The XLR's are connected as shown in the figure above.

Note: care should be taken to ensure that none of the pins touch the metallic body of the plug or each other. XLR plugs and sockets mustn't be connected in any way other than mentioned in the above figure. The Fixture accepts digital control signals in protocol DMX512 (1990).

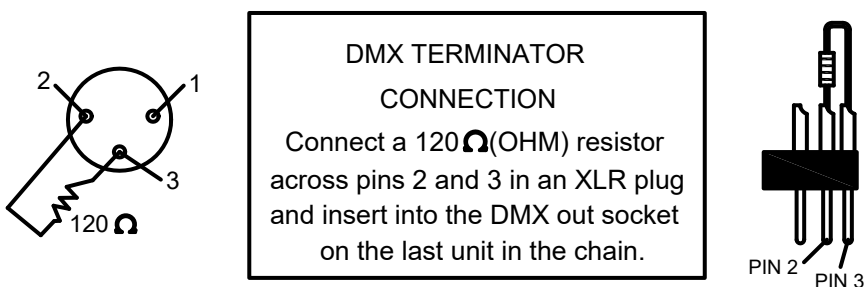

Connect the controller's DMX output to the first fixture's DMX input, and connect the first fixture's DMX output to the second fixture's DMX input and connect the rest fixtures in the same way. Eventually connect the last fixture's DMX output to a DMX terminator as shown in the figure below.

## DMX TERMINATOR

In the Controller mode, at the last fixture in the chain, the DMX output has to be connected with a DMX terminator. This prevents electrical noise from disturbing and corrupting the DMX control signals.

The DMX terminator is simply an XLR connector with a 120Ω (ohm) resistor connected across pins 2 and 3, which is then plugged into the output socket on the last projector in the chain. The connections are illustrated below.

## •ALIGNMENT/INSTALLATION/REPLACEMENT OF A LAMP

Please hold the projector well before adjustment/installation/replacement of lamp. As shown in figure1, remove fan cover of the head and heat sink.

Removal/Installation of lamp as shown in figure2

Adjust the lamp as shown in figure3

Before the removal of the lamp, unplug the lamp wires. And plug lamp wires after a new one is in.

- Don't touch the internal surface of the reflector and the burner of the lamp with bare hands so as not to impair the beam output. There is a protruding metal wire in the lamp, while installation do not damage it. Hold the lamp body well before its removal. It's forbidden to use force on the ceramic stand, otherwise it will loosen or fall off.
- Please read "Instructions " enclosed with the lamp
- While adjusting the lamp, it is forbidden to carry out the functions not associated with lamp adjustment.

**Figure1:** loosen 4 screws of the fan cover of the head before removing it. Then loosen the screws of heat sink and remove it and the fan.

**Figure2:** Unplug the lamp wires , push the upper clipping plate toward the spring with force, but push the lamp in the opposite direction till it is off the plate, then take the lamp out obliquely. The same applies to its installation.

**Figure 3:** After the replacement of the lamp, please ensure first the lamp is clipped well before plugging lamp wires. Turn the lamp on and adjust the lamp's position to the middle. After that, install the heat sink, fan and fan cover.

The procedures for replacement/adjustment of a lamp:

1. After the projector is powered on, disable the following function in the menu: services-factory mode- lamp fan sensor , then shut it from power
2. Loosen the 4 screws of the fan cover and remove it.
3. Loosen 4 screws of the fan plate, remove the fan and the clump weight, loosen 10 screws of the heat sink and remove it.
4. Push the upper clipping plate of the lamp towards the spring, and at the same time pus the lamp towards the opposite till it is off the plate and remove it obliquely,
5. The installation of the lamp is the same as its removal
6. Check if the lamp wires are plugged well, then turn on the lamp for adjustment
7. After the adjustment of the lamp, activate the following function in the menu: services-factory mode- lamp fan sensor. Then shut it from the power
8. Check if the seals are good or not. If not, replace them with good ones. If no, install the heat sink, fan and fan cover in the opposite sequences as the removal.
9. After installation, power it on. The projector will execute the total reset. After that, the projector can be used normally.

## •GOBO REPLACEMENT

#### Replacement of the Gobos:

Open the chamber cover after loosening 4 screws. Select the rotator for replacement of gobo. Push the rotator at the opposite side of its gear till it is off the holder of the rotating gobo wheel. Remove the rotator gently. After replacement of the gobo, place the rotator into the wheel and ensure it is in the right position and not loose.

#### **DANGER!**

**Before replacement of gobos, the projector must be off the power.**

## 5. SETUP AND CONFIGURATION

### •FRONT PANEL OPERATION

To browse through or change the projector's settings, press ENTER key for more than 3s (press ENTER key after power on) to unlock the screen, then press UP/DOWN key to enter the projector's function menus. Each main menu has its sub-menus. And each menu stands for special function. For the details, please see the following 6<sup>th</sup> point "Operation Menu".:

1. At the page to set the fixture's functions, press **UP** or **DOWN** key to select the functions desired.
2. While menu operations, the **FUNC** key to escape, and **ENTER** key is used to confirm. Press **ENTER** key to save the changes or enter into the sub menus. Press **UP** or **DOWN** key to change the numbers (minus or plus).

Press FUNC key to go to the upper menu. If no key is pushed, the system will go back to initial status automatically.

### • DMX START ADDRESS

Each projector must be given a DMX start address so that the correct projector responds to the correct control signals. This DMX start address is the channel number from which the projector starts to "listen" to the digital control information being sent out from the controller. The projector has 3 DMX modes. There are standard mode, short mode and extended mode. For example standard mode has 26 channels, so set the No. 1 projector's address 001, No. 2 projector's address 027, No. 3 projector's address 053, No. 4 projector's address 079, and so on.

Switch on the Projector . Press **ENTER** key more than 3 seconds to unlock panel, then press **UP** or **DOWN** key to enter into the fixture's operation menus.

Select DMX Address icon and press ENTER key on the display and select DMX address at the 2<sup>nd</sup> level menu for the address setting.

Press **UP** or **DOWN** key for the DMX address desired.

Press **ENTER** key to confirm.

Press the **FUNC** key to go back to the upper level menu.

### •DMX WIRELESS CONTROL

The projector has wireless control function with wireless receiver module and antenna for remote control.

The setup of it is below:

1. Press **ENTER** for more than 3s to unlock the control panel, then press **UP** or **DOWN** key to enter into the operation menu and select "Config Settings".
2. Select "Wireless Only" from the menu of "Signal Select".

Only after the projector is linked with a transmitter, can it receive wireless signal sent by the transmitter. If unlinking it, Press "Enter" for the menu of Un-link Wireless under the upper level menu of Config Settings , then the fixture is unlinked with the wireless transmitter.

### •STAND-ALONE MODE

Operate the projector without connecting with a controller, enable the master mode through the operation panel, the projector will run in Stand-Alone mode automatically.

DMX address can be set at any number within 512.

### •MASTER/SLAVE MODE

Many projectors can run synchronously in the Master/Slave mode by linking them with each other. First, connect the first fixture's DMX output to the second fixture's DMX input using XLR-XLR control cable and then connect the second fixture's DMX output to the third fixture's DMX input, and so on until all projector are connected in this way. Eventually connect the last fixture's DMX output to a DMX terminator. Set 1<sup>st</sup> projector as the master and others are Slaves.

Start Addresses of all Slaves are 001; Operation mode of the Master can be set any mode for a Master' and Slaves' operation mode can be set accordingly.

After Powered on, the group will run in Master/Slave Mode

Remarks: Lamp fan sensor is only used during lamp adjustment

Open: the lamp is affected by the lamp fan. If the lamp fan fails, the lamp won't be on.

Close: the lamp is not affected by the lamp fan. Even if the lamp fan is not installed, the lamp will be on, but Pan and Tilt are without force .

“Close” status is used only in emergency. If the lamp fan won't run for long, it will cause harm to the lamp.

After lamp adjustment, set the “lamp fan sensor as “Open” and activate total reset.

				200-209	Total Reset
				210-229	Reserved
				230-239	Lamp Off
				240-255	Reserved

1.The projector can't be turned on within 1 minute after the lamp-off.

2.Fan error can cause lamp-off.

3.Note: "Speed Mode" means Pan and Tilt will move from Point A to Point B at their respective maximum speeds."Time Mode" means both Pan and Tilt will arrive at designated point at the same time. It's advised Time Mode be used if the projector runs circles or in oblique lines.

4.The DMX range between 6 and 24 under DMX channel Color Wheel is for diffuser control . If any rotating gobo moves in, the diffuser will move in automatically and DMX channel Color Wheel won't work.

## 8. SIGNS ON THE TOUCH SCREEN

	Lamp control		Option Settings
	Chinese-English		Information
	Error messages		Service
	Address		Operation Mode
	Reset		User Memories
	Config Settings		

## 9.ERROR MESSAGES

The system can detect some errors during the reset, if  displayed, touch  to view the error.  
The error messages are as follows:

Name	Type	Correction
Pan	Timeout/magnet Sensor/Encoder	Check if wiring, positioning parts and motors are normal
Tilt	Timeout/magnet Sensor/Encoder	Check if wiring, positioning parts and motors are normal
Cyan	Timeout	Check if wiring, positioning parts and motors are normal
Yellow	Timeout	Check if wiring, positioning parts and motors are normal
Magenta	Timeout	Check if wiring, positioning parts and motors are normal
CTO	Timeout	Check if wiring, positioning parts and motors are normal
Color Wheel	Timeout	Check if wiring, positioning parts and motors are normal
Fixed gobo wheel	Timeout	Check if wiring, positioning parts and motors are normal
Rot. Gobo Wheel	Timeout	Check if wiring, positioning parts and motors are normal
Rot. Gobo Rotation	Timeout	Check if wiring, positioning parts and motors are normal
Dimmer	Timeout	Check if wiring, positioning parts and motors are normal
Prism 1	Timeout	Check if wiring, positioning parts and motors are normal
Prism 1 Rotation	Timeout	Check if wiring, positioning parts and motors are normal
Prism 2	Timeout	Check if wiring, positioning parts and motors are normal
Prism 2 Rotation	Timeout	Check if wiring, positioning parts and motors are normal
Focus	Timeout	Check if wiring, positioning parts and motors are normal
Ceramic stand fan	Error	Check if fan and its wiring are normal
CMY Fan	Error	Check if fan and its wiring are normal
Head Fan	Error	Check if fan and its wiring are normal
Head Fan 2	Error	Check if fan and its wiring are normal
Base box Fan	Error	Check if fan and its wiring are normal
Pan and Tilt Board	Error	Check signal wire
Driver Board 1	Error	Check signal wire
Driver Board 2	Error	Check signal wire
Acceleration Sensor	Error	Check signal wire
Lamp on	Timeout	Check if the lamp is damaged
Lamp Life	Timeout Warning	
Lamp Off[Fan Error]	Error	Check if all fans are normal
Lapsed Time	Timeout	
Time IC	Error	
Lapsed time	X days	
Use hours Setting	successfully	

## 10. TECHNICAL DATA

### ELECTRIC PARAMETERS

Input voltages 100V~240V AC, 50/60Hz

Input Power 800W @ 220V

Current at Maximum 8A

Power factor: PF) 0.9

### LAMP SPECIFICATIONS

Lamp: PHILIPS MSD Platinum 25 R

Color Temperature: 7800

Manufacturers Rated Lamp Life: 1500hours

Lamp: PHILIPS MSD Platinum 500L Flex (550W) (Optional)

Color Temperature: 7800K

Manufacturers Rated Lamp Life: 1500hours

Energy Save Mode: 4000hours

### COLORS

CMY color mixing system with macros

1 Colour Wheel: 12colors+ Open, rainbow effect with bi-directional and variable speeds, Stepping/linear color changing

No.	Code No.	Colors
1	092550001A	Red
2	092550002 A	Light Green
3	092550003 A	Blue
4	092550004 A	Cyan
5	092550005 A	Yellow

6	092550006 A	Magenta
7	092550007 A	Orange
8	092550008 A	Green
9	092550009 A	Dark Blue
10	092550010 A	UV
11	090072333	Gold
12	090071258	Dark Yellow

## INDEPENDENT CTO SYSTEM

Linear CTO system

## FIXED GOBO WHEEL

1 Fixed gobo wheel: 18 gobos +Open

Bi-directionally rotatable, and shakable at variable speeds

Gobo1	Gobo2	Gobo3	Gobo4	Gobo5	Gobo6	Gobo7
						
Gobo8	Gobo9	Gobo10	Gobo11	Gobo12	Gobo13	Gobo14
						
Gobo15	Gobo16	Gobo17	Gobo18			
						

## ROTATING GOBO WHEEL

1 Rotating gobo wheel:

7Interchangeable Gobos +Open

Bi-directionally rotatable, and shakable at variable speeds

Gobo1	Gobo 2	Gobo 3	Gobo 4	Gobo 5
				
Gobo 6	Gobo 7			

Gobo Replaceable, Gobo diameter:  $\Phi 22.5\text{mm}$  ,Gobo image diameter:  $\Phi 12\text{mm}$

#### **PRISM/FROST**

3 pcs of prisms which can be overlapped (8 facet circular prism+ 4facet linear prism) (16 facet circular prism+ frost) And other optional prisms

#### **FOCUS**

DMX linear Focus

#### **DIMMER/STROBE**

0-100% Linearly adjustable/ Double shutter blades, 0.3~25 F.P.S

#### **HEAD MOVEMENT**

Pan  $540^\circ$ , Tilt  $270^\circ$  with auto position correction

#### **BEAM ANGLE**

Beam angle  $2^\circ$

#### **CONTROL**

DMX512, 5-pin interfaces(Optional 3-pin)

22channels in short mode, 26channels in standard mode , 30channels in extended mode

Self-test mode

#### **OTHER FUNCTIONS**

Adjustable Pan & Tilt speeds

Lamp's and fixture's hours displayed

Modular Structure for easy maintenance

DMX512 wireless receiver

DMX512 Wireless Transmitter (Optional)

ArtNet (Optional)

#### **HOUSING**

Cast Aluminum and high temperature and UV resistant ABS, IP66

#### **NET WEIGHT:**

**39.8 Kg**

**WORK TEMPERATURE**

Maximum ambient temperature: 45°C

For a waterproof fixture: if the ambient temperature is minus 20 Celsius, strike the lamp to pre-heat for 10minutes and reset it again.

**SIZES**

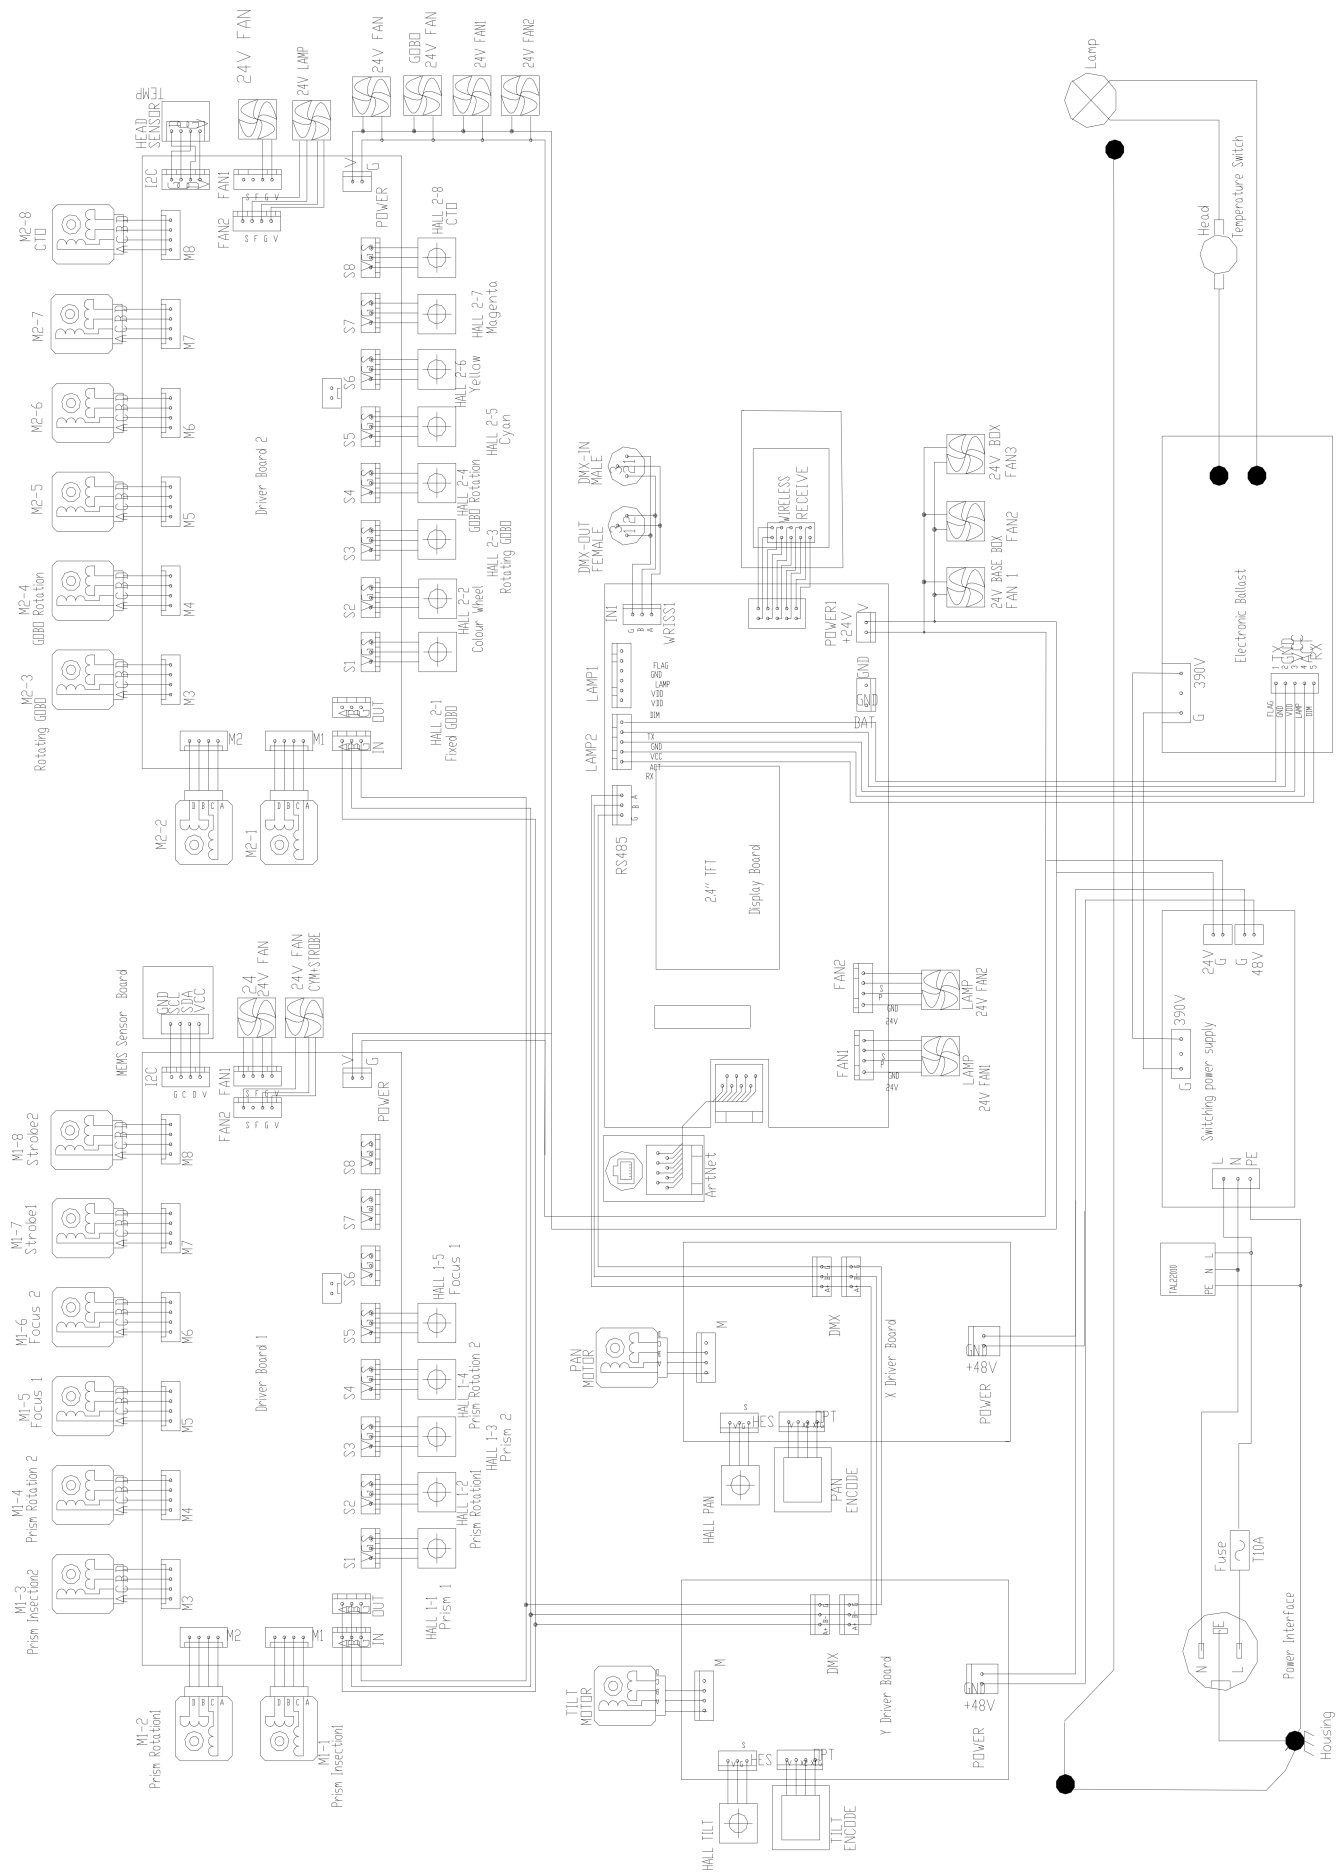

**LIGHT OUTPUT**

## **Appendix: Advice on the Use of Platinum Lamps**

Dear Client,

The platinum lamps favored by the lighting sector have high color temperature, high brightness, high CRI, pure light beam and other advantages. For their use, some advice is offered for your reference:

1. After lamp on, it shouldn't be turned off in a very short while. Frequent lamp on and offs will wear out its electrodes, thus resulting in lower brightness and lumen decrease.
2. It's advised to turn off the lamp by controller, but not by shutting off the mains power which can stop the cooling system from working immediately, shortening the lamp's lifespan and may cause short circuit between the electrodes.
3. In case of emergent blackout, do not strike the lamp immediately after mains power recovers. The lamp can be re-stricken successfully 10-15minutes after lamp-off while the fixture's temperature is lower than the start one.
4. The metal vapor in the lamp can cause aging and harm to the place of the burner where it accumulates after the head is fixed at certain position for a long time, resulting in whitening of the burner glass, cracking in it and even damage, thus shortening of its life. It's advised to let the head move in slow speed after shutters closed while the fixture is idle to avoid the head at fixed angle for a long time.

Thank you for your trust and patience.
